Sustainable Impact

The world is changing, and we need to **act now** to secure our future.

Our Sustainable Futures Plan is focused on three key areas where we can make food and agriculture systems more sustainable and food secure- advancing climate solutions, preserving and regenerating nature, and supporting and improving livelihoods.

Our Plan is backed by clear targets, actions, and investments, address key issues shaping our global food and agricultural system – soil degradation, biodiversity loss, land and water stress, food insecurity, farmers' living income. It is underpinned by our commitment to responsible business across our entire value chain.
