

## Traceability

Olam Agri and two refineries in Mozambique under Olam Group Ltd transparently reports all our palm oil volume, which include volume from our own refineries as well as traded volume. The traded volume also includes volumes (i.e.) that are not processed in our own facilities but rather Olam Agri as an intermediary seller, as buy and sell volume.

We have maintained 100% traceability to mill (TTM) since 2020 and have achieved 80% traceability to plantation (TTP) for our global volume, including the traded (direct and indirect volumes).

The below chart is to show progress of traceability for global volumes of Olam Agri and two refineries in Mozambique under Olam Group Ltd. (refineries and traded volume).

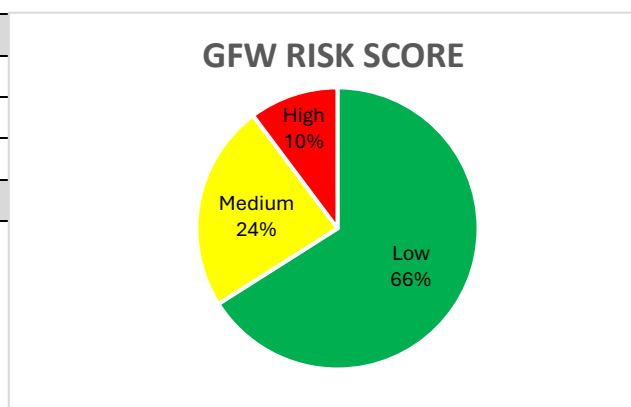

Out of 1200 mills in 2023, 512 mills are sourcing 100 percent from their plantation and or third party plantation, for the remaining we are still developing program to establish the percentage coming from own and or third party plantation vs agent and or smallholders.

## Mill Risk Rating

100% our direct suppliers have complied with Olam's Responsible Sourcing Palm Oil Policy & Olam Supplier Code.

We have assessed our all of the mills in our supply chain for both direct and indirect sourcing through the Global Forest Watch ([Global Forest Watch Pro](#)). The charts below represent global GFW Risk Score of Olam Agri and two refineries in Mozambique under Olam Group Ltd supplier mills in January – December 2023

GFW Score	Mills	%
Low	791	66%
Medium	286	24%
High	123	10%
<b>Grand Total</b>	<b>1200</b>	<b>100%</b>
